

LEANDRO ERCOLI

SOFTWARE ENGINEER · FRONTEND & FULL STACK DEVELOPER

leandroercoli@gmail.com | linkedin.com/in/leandroercoli | github.com/leandroercoli | leandroercoli.com.ar

SUMMARY

Frontend-focused Full Stack Engineer with 8+ years building performant, accessible web applications for global audiences. Strong experience with React, Next.js, and TypeScript, plus solid Node.js and API work. Comfortable leading teams, owning technical architecture, and delivering product features, from early-stage startups to Fortune 500 platforms. Based in Buenos Aires, Argentina, and open to fully remote roles.

PROFESSIONAL EXPERIENCE

Frontend Engineer · Fever Jan 2026 – Present
Remote · Madrid, Spain

- Build and maintain consumer-facing features for Fever's live-entertainment discovery platform, serving audiences across 40+ countries with React and TypeScript.
- Partner with design and product to ship responsive, accessible interfaces for high-traffic event discovery and ticketing flows, prioritizing Core Web Vitals and page performance.
- Contribute to the shared component library and testing practices to improve UI consistency and reliability across the consumer app.

Full Stack Engineer & Tech Lead · Deel Sep 2024 – Dec 2025
Remote · San Francisco, US

- Led a team of engineers delivering full-stack features for a global HR and payroll platform using React, TypeScript, Node.js, and SQL.
- Owned technical architecture and code quality, setting up review, testing, and CI/CD practices that reduced regressions and made releases more predictable.
- Mentored engineers and coordinated across teams to keep projects on schedule.

Full Stack Engineer · designstripe May 2022 – Feb 2024
Remote · Canada

- Built full-stack features for a social-media marketing and branding SaaS using Next.js, React, Redux, TypeScript, Nest.js, GraphQL, and MongoDB.
- Wrote unit and integration tests with Jest to catch regressions before release.

Frontend Engineer & Tech Lead · Leniolabs Aug 2020 – May 2022
Remote · Argentina

- As Tech Lead, led the team building a client project for ICE, a Fortune 500 company, using React, Redux, and TypeScript, improving mortgage-processing workflows for end users.

Full Stack Engineer · Haasten May 2018 – Jul 2021
Remote · Argentina

- Developed cloud-integrated apps for an agro-tech startup using React, Redux, Node.js, and MongoDB for real-time data monitoring via web interfaces.

Tech Lead & Full Stack Engineer · Eycon Aug 2018 – Aug 2020
Argentina

- Led full-stack web and mobile development for a smart-transportation tracking product using React, React Native, Laravel, and MySQL.

EDUCATION

MSc, Computer Engineering · Universidad Nacional del Sur 2012 – 2018
Bahía Blanca, Argentina · Teaching Assistant, Object-Oriented Programming & Data Structures (2016)
